

# WRAPPER

'Minimalism and change'. In the period we live in, these two concepts have taken their place in our social and personal lives and have become accustomed to them. WRAPPER was designed based on the concrete impressions of these two concepts.

Two main materials, wood and filled fabric, are used in the product.

The bed structure (headboard, front and side blocks) and nightstands (commodes can be attached and detached according to the user's request) are made of wooden material and in a minimal form as possible. In this way, it highlights the filled fabric pieces and accessories on it.

The wood material is offered in 3 colors as natural oak veneer, gray lacquered oak veneer and black lacquered oak veneer. The block woods on the headboard - front - side parts of the bed are wrapped with filled fabrics in different forms, textures and colors, and these fabrics are fixed to the wooden parts with the snap buttons on them. The fact that the filled fabrics can be easily changed according to the user's request, personalizes the product and adds difference to the environment and the product.

In the WRAPPER bed, a minimal image is displayed thanks to the block woods, as well as an interactive product with replaceable filled fabrics.

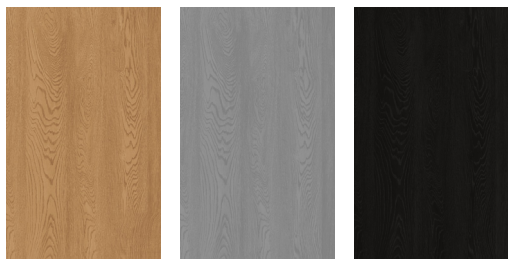

EDA23-240

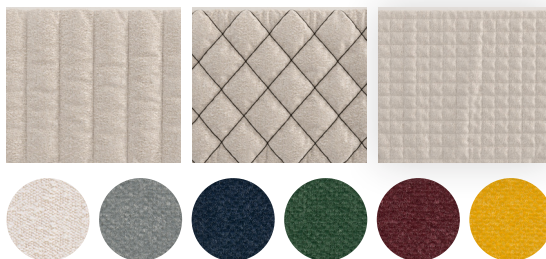

### WRAPPED - WOOD - MATERIALS

The wood material is offered in 3 colors as natural oak veneer, gray lacquered oak veneer and black lacquered oak veneer.
